

Project CV

Before going to internship

42 Staff pedago@staff.42.fr

Summary: That's it, even if it's easy, you must have done it once.

Contents

I	Introduction	2
II	The project	3
III	The offer	4

Chapter I

Introduction

Just as creative, atypical, or particular as you may be, and that you can legitimately claim, there are still some social codes in the world of work that you can hardly overcome, at least in the immediate future. As your professional integration is high on the school's agenda, it is natural for us to be interested in this gateway (among others) that is the establishment of your CV.

Chapter II

The project

In order to allow you to search for your first internship with a CV that will attract the eye rather than scare the recruiter, we invite you to devote the necessary time.

We suggest the following scenario: :

- Prepare your CV
- Participate in regularly organized CV workshops
- Make this project CV, which is to provide a CV in response to a proposal
- Carefully perform peer-correcting for the benefit of all
- A subsequent return may be possible from a recruiting professional
- Start your internship search
- Adjust the CV according to the internship offers

Submit your CV on Vogsphere in *PDF* format, only at the root of the repository. The file name must be reasonable for a recruiter. It will be corrected classically in peer-correcting according to the scale established by a professional recruitment sector specialist. Only this file present on your GIT will be evaluated in defense.

Chapter III

The offer

The CV you will make is in response to this offer:

Back-End Developer / Automatic creation of digital contents

Project :

Automation of magazine creation from feeds

"Gyroscope" is the code name of a batch process that can create amazing XML-based magazines or digital newspapers and layout templates (eg, Sunday Newspaper - iPad App).

Course objectives :

You will be an integral part of the PapieRSS developer team and will work on:

- *Improved workflow to make the production cycle faster - iPad preview.*
- *Creating a database of the article that will be used to import the publisher's content and populate the Publisher templates.*

Trainee profile :

Training Bac+3 minimum in computer development, you have a good level in web development: PHP, C, PostgreSQL, CSS, Javascript. You also have a good knowledge of web application architectures, especially back-end.

Qualities sought :

- *Creativity, passion and curiosity*
- *Autonomy.*
- *Good conceptual abstraction.*
- *Strict visual requirement.*
- *Ergonomics skills.*
- *Analytical and rigorous mind.*

This internship can lead to a hiring according to the results.

Start, duration and place :

As soon as possible for a period of 6 months in Plougastel-Daoulas (Finistère).

This internship fits you and inspires you? Do not hesitate and send us your application (CV) at the following address: stages@paperss.fr .
